801-538-4956 * Fax 801-538-4949

Welcome to the Utah Department of Agriculture and Food's new Cottage Food Production Operation program. A recent statute passed by the Utah state legislature will now allow Utah residents to produce non-potentially hazardous food products in their homes and offer them for sale within the state. Production can only be permitted in homes with no free-roaming indoor pets such as cats or dogs.

Please read through the information located here on the web site to learn more about this new program. We have a list of guidelines and a checklist, as well as the full text of the Cottage Food Rule so that you can understand all of the requirements. If you would like to submit an application, please contact me at the address below to receive the application form and any additional information.

You can also begin working on correct labels to meet both Federal labeling requirements and the specific additional requirements for a home produced product. There is a document here on the site which will help you understand the requirements. If you plan to provide your products by special order or deliver them in person rather than selling pre-marked packages, you will not need full labels, but you will need a full list of the ingredients in each product to provide to the customer upon request. You can submit your labels or ingredients lists with your recipes or at a later date, but they must be reviewed prior to your start of operations.

Please contact me for further information. I look forward to working with you as you start your new business.

Checklist for Home Food Production

<p>Complete the Cottage Food Product Application form for each product to be produced, including with each the recipe with ingredients, amounts, and step-by-step procedures for approval and draft copies of all labels for review.</p>	
<p>No commercial food processing may occur in any household with free-roaming indoor pets.</p>	
<p>Any person who will be handling food needs to get a Food Handler's Permit from their local health department.</p>	
<p>Arrange separate storage for all Cottage Food ingredients, including separate refrigeration if needed.</p>	
<p>Products with any of the eight major allergens (peanuts, tree nuts, milk, egg, soy, wheat, fish, and shellfish) must be prepared in a way that will not contaminate products which do not contain those allergens. Be prepared to explain how you will accomplish this.</p>	
<p>Production of commercial food products may not occur at the same time as domestic food preparation in the same kitchen.</p>	
<p>When commercial food processing is taking place, all unauthorized persons, including family members and visitors, must be excluded from the processing area.</p>	
<p>All cooking utensils and equipment must be washed, rinsed, and sanitized after use or exposure to contamination. Be prepared to demonstrate your intended procedures.</p>	
<p>Sanitizer test strips must be available for testing of bleach or other sanitizer solution strength; these strips can be obtained at restaurant supply stores.</p>	
<p>Multi-use equipment and utensils (such as cutting boards, counter tops, knives, spoons, and tongs) shall be constructed of safe materials, including finishing materials; shall be corrosion resistant and shall be non-absorbent; and shall be smooth, easily cleanable and durable under conditions of normal use.</p>	
<p>All equipment and utensils, including plastic ware, shall be designed and fabricated for durability under conditions or normal use; shall be made from safe materials and shall be resistant to denting, buckling, pitting, chipping and crazing.</p>	
<p>The use of wood is restricted to non-absorbent hardwood surfaces such as cutting boards.</p>	

Checklist for Home Food Production

Food contact surfaces shall be easily cleanable, smooth and free of breaks, open seams, cracks, chips, pits and similar imperfections and free of difficult to clean internal corners and crevices.	
Wiping cloths shall be stored in a sanitizing solution, such as diluted bleach or other approved sanitizer, if they are going to be reused for an hour or more.	
All food, equipment and single service articles shall be stored at least six inches above the floor. Such storage shall not be under exposed or unprotected sewer lines or water lines that are leaking or on which condensed water has accumulated.	
Ingredients, finished products, and single service articles shall be stored separately from domestic foods and supplies, and shall only be used for the cottage food production.	
Food, equipment, utensils, or single service articles shall not be stored or prepared in bedrooms, toilet rooms or their vestibules, garbage rooms or mechanical rooms. Food may be stored in an enclosed garage only in a self-contained refrigerator/freezer.	
All equipment and utensil washing sinks, food preparation sinks, and hand sinks shall be supplied with hot and cold water under pressure.	
All sewage, including liquid waste, shall be disposed of by a public sewage system or by a sewage disposal system constructed, maintained and operated according to state and local requirements.	
Plumbing connections shall not create a backflow or backpressure condition that might contaminate the water supply.	
Garbage and refuse shall be held in durable, easily cleanable insect resistant and rodent resistant containers that do not leak and do not absorb liquids. Garbage containers shall be of a sufficient number to hold all the garbage and refuse that accumulates.	
Clean linens including articles such as wiping cloths shall be stored in a clean place and protected from contamination until used.	
We recommend that you check with your insurance company to determine impacts of a home-based business on homeowner's liability.	

Title/Chapter/Section: Go To

[Utah Code](#)

[Title 4](#) Utah Agricultural Code

[Chapter 5](#) Utah Wholesome Food Act

Section 9.5 Cottage food production operations.

4-5-9.5. Cottage food production operations.

(1) For purposes of this chapter:

(a) "Cottage food production operation" means a person, who in the person's home, produces a food product that is not a potentially hazardous food or a food that requires time/temperature controls for safety.

(b) "Home" means a primary residence:

(i) occupied by the individual who is operating a cottage food production operation; and

(ii) which contains:

(A) a kitchen designed for common residential usage; and

(B) appliances designed for common residential usage.

(c) "Potentially hazardous food" or "food that requires time/temperature controls for safety":

(i) means a food that requires time and or temperature control for safety to limit pathogenic microorganism growth or toxin formation and is in a form capable of supporting:

(A) the rapid and progressive growth of infections or toxigenic microorganisms;

(B) the growth and toxin production of *Clostridium botulinum*; or

(C) in shell eggs, the growth of *Salmonella enteritidis*;

(ii) includes:

(A) an animal food;

(B) a food of animal origin that is raw or heat treated;

(C) a food of plant origin that is heat treated or consists of raw seed sprouts;

(D) cut melons;

(E) cut tomatoes; and

(F) garlic and oil mixtures that are not acidified or otherwise modified at a food establishment in a

way that results in mixtures that do not support growth as specified under Subsection (1)(c)(i); and

(iii) does not include:

(A) an air-cooled hard-boiled egg with shell intact;

(B) a food with an actual weight or water activity value of 0.85 or less;

(C) a food with pH level of 4.6 or below when measured at 24 degrees Centigrade;

(D) a food, in an unopened hermetically sealed container, that is processed to achieve and maintain

sterility under conditions of nonrefrigerated storage and distribution;

(E) a food for which laboratory evidence demonstrates that the rapid and progressive growth of items listed in Subsection (1)(c)(i) cannot occur, such as a food that:

(I) has an actual weight and a pH level that are above the levels specified under Subsections (1)(c)(iii)(B) and (C); or

(II) contains a preservative or other barrier to the growth of microorganisms, or a combination of barriers that inhibit the growth of microorganisms; or

(F) a food that does not support the growth of microorganisms as specified under Subsection (1)(c)(i) even though the food may contain an infectious or toxigenic microorganism or chemical or physical contaminant at a level sufficient to cause illness.

(2) (a) The department shall adopt rules pursuant to Title 63G, Chapter 3, Utah Administrative

Potentially Hazardous Foods that are not allowed

Foods that are allowed (but may need to be tested)

Rulemaking Act, as necessary to protect public health and ensure a safe food supply.

(b) Rules adopted pursuant to this Subsection (2) shall provide for:

(i) the registration of cottage food production operations as food establishments under this chapter;
(ii) the labeling of products from a cottage food production operation as "Home Produced"; and
(iii) other exceptions to the chapter that the department determines are appropriate and that are consistent with this section.

(3) Rules adopted pursuant to Subsection (2):

(a) may not require:

(i) the use of commercial surfaces such as stainless steel counters or cabinets;

(ii) the use of a commercial grade:

(A) sink;

(B) dishwasher; or

(C) oven;

(iii) a separate kitchen for the cottage food production operation; or

(iv) the submission of plans and specifications before construction of, or remodel of, a cottage food production operation; and

(b) may require:

(i) an inspection of a cottage food production operation:

(A) prior to issuing a registration for the cottage food production operation; and

(B) at other times if the department has reason to believe the cottage food production operation is operating:

(I) in violation of this chapter or an administrative rule adopted pursuant to this section; or

(II) in an unsanitary manner; and

(ii) the use of finished and cleanable surfaces.

(4) (a) The operator of a cottage food production operation shall:

(i) register with the department as a cottage food production operation before operating as a cottage food production operation; and

(ii) hold a valid food handler's permit.

(b) Notwithstanding the provisions of Subsections **4-5-9**(1)(a) and (c), the department shall issue a registration to an applicant for a cottage food production operation if the applicant for the registration:

(i) passes the inspection required by Subsection (3)(b);

(ii) pays the fees required by the department; and

(iii) meets the requirements of this section.

(5) Notwithstanding the provisions of Section **26A-1-114**, a local health department:

(a) does not have jurisdiction to regulate the production of food at a cottage food production operation operating in compliance with this section, as long as the products are not offered to the public for consumption on the premises; and

(b) does have jurisdiction to investigate a cottage food production operation in any investigation into the cause of a food born illness outbreak.

(6) A food service establishment as defined in Section **26-15a-102** may not use a product produced in a cottage food production operation as an ingredient in any food that is prepared by the food establishment and offered by the food establishment to the public for consumption.

BASIC LABELING GUIDELINES FOR HOME PRODUCED FOODS

The State of Utah through the Utah Code Annotated (UCA) has adopted the regulations promulgated under the Federal Fair Packaging and Labeling Act as set forth in the Code of Federal Regulations (CFR).

The following information is required by law to be on a food label for a home produced food before the product is offered for sale. The minimum print height for any of this required information is 1/16 inch (based on the lower case letter “o” unless only upper case letters are used).

- Statement of Identity (Common or usual name of product). (21 CFR 101.3)
- The net quantity statement. (21 CFR 101.105)
- The words "Home Produced" in bold and conspicuous 12 point type on the principal display panel. (R70-560-6)
- An ingredient statement (unless it is a single ingredient product). (21 CFR 101.4)
- The name, street address, city, state, zip code, and telephone number of the cottage food production operation. (21 CFR 101.5 and R70-560-6)
- Nutrition Statement: Most products must also have a Nutrition Facts statement following the FDA approved format. (21 CFR 101.9)

1. The product name must appear on the principal display panel (PDP = the portion of the label expected to be displayed when the product is offered for sale.) It must be prominent and in bold type and be an appropriate descriptive name that is not misleading. It should be printed generally parallel to the base of the package and at least 1/2 the size of the largest print on the label.

2. The net quantity statement must be appropriate for the type of product. Generally, products that are solid, semi-solid, viscous, or a mixture of liquid and solid, are labeled by net weight (unless trade custom allows them to be labeled by count.) Liquids are generally labeled in fluid volume. Some products are required to be labeled by dry volume, length, area, etc. Any net content statement that does not permit price and quantity comparison is forbidden.

The net quantity is to be stated as a definite amount - do not use qualifying statements such as: when packed, approximately, minimum, or words of similar import. Nor shall any unit of weight or measure be qualified with terms that tend to exaggerate the amount of the commodity, such as: jumbo, giant, full, etc. On the average the quantity of the commodity in the package must **at least equal** or exceed **the labeled quantity** with no unreasonable shortages in any package even when overages in other packages compensate for such shortage.

The net quantity statement must appear in the bottom 1/3 of the PDP label in the largest whole units of both the US System of Measures and the metric equivalent. This means the net weight will show the **total number of ounces** if product net weight is **less than one pound**, or show **pounds and ounces** if the net weight is **one pound or more**. Either US or metric quantity may be printed first, the equivalent quantity following in parenthesis. Do not use periods behind abbreviations or “s” to indicate plurals. Metric abbreviations must be printed in lower case letters, except you may use either “l” or “L” to indicate liter and “ml” or “mL” for milliliter. (Use **1 oz = 28.3495 g** to calculate net **weight** conversions or **1 fluid ounce = 29.5735 mL**, then round appropriately.)

The print size required for the net quantity statement is based on the area of the principal display panel (print size is based on the height of the lower case letter “o” unless only upper case letters are used.) The statement must be prominent, conspicuous and easy to read. An area equal to the height of the required lettering **above and below** the quantity statement must be left **free** of other print.

Area of Principal Display Panel

5 square inches or less

More than 5, but not more than 25 sq. in.

More than 25, but not more than 100 sq. in.

More than 100, but not more than 400 sq. in.

Over 400 square inches

Type Size Required

Not less than 1/16 inch

Not less than 1/8 inch

Not less than 3/16 inch

Not less than 1/4 inch

Not less than 1/2 inch

3. The words "**Home Produced**" must appear in bold and conspicuous 12 point type on the principal display panel.

*The next three items may be on the **PDP** or on the **information panel** (IP = usually the portion of the package immediately to the right of the PDP). Nonessential, intervening print and/or art work are not permitted between the required labeling items (e.g., the UPC bar code is not required labeling).*

4. **Ingredient statements must begin with the word "Ingredients:" followed by a colon.** All ingredients must be listed by **common or usual name** in descending order of predominance by weight (**from heaviest to lightest**). Any ingredient which itself contains two or more ingredients:

a) shall declare the common or usual name of the ingredient followed by a parenthetical listing of all ingredients contained therein in descending order of predominance;

b) or by incorporating into the statement of ingredients in descending order of predominance in the finished food, the common or usual name of every component of the ingredient without listing the ingredient itself. (Use **only one of these formats per label** please.)

For any product containing an ingredient which is or is derived from one of the eight major food allergens (milk, egg, wheat, soy, fish, shellfish, tree nuts, or peanuts), the presence of the allergen must be indicated in the ingredients. If the common or usual name of the ingredient contains the name of the allergen (i.e. soybean oil), then no further notation is required. If the name does not clearly indicate the allergen (i.e. casein, whey protein, enriched flour) then the allergen must be stated either in parenthesis following the ingredient, or in a "Contains" statement immediately below or next to the ingredients, in a type size no less than that used for the ingredients. If the "Contains" statement is used, it must list all of the allergens present in the product, whether listed by name in the ingredients or not.

5. The name, street address, city, state, zip code, and phone number of the cottage food production operation

6. Nutrition Statement: FDA requires a Nutrition Statement on almost all food offered for sale. The statement must follow the approved FDA format. Some foods categories are **exempt from the nutrition statement**: foods produced by small (as defined by FDA) businesses; foods served in restaurants and/or sold ready for immediate consumption; certain foods sold directly to consumers from the location where they are prepared (delis and bakeries); foods that provide no significant nutrition (plain, unsweetened coffee; most single ingredient spices, etc.) **Any health or nutrition claim or nutrition information on product labeling or advertisements void these exemptions.**

SELF-SERVE BULK FOOD DISPENSERS

The requirements for food products sold from **bulk, self-serve containers** differ only slightly from those for packaged foods. The product name; name and address of the cottage food production operation; price per unit (per pound or per each); nutrition facts; and ingredient list in descending order of predominance must be on all dispensing units. **Ingredients must be printed in letters measuring at least 1/8" in height (again based on lower case letter "o", unless only upper case letters are used).**

FULL-SERVICE FOOD (WRAPPED OR UNWRAPPED)

Food items which are accessible to customers only through employee-assistance, such as products from delis, bakeries, candy counters, etc., need not be labeled with ingredient information. However, complete and correct ingredient information for all products offered for sale, shall be readily available to all store personnel in case of consumer questions. This information must be accurate and kept current for the benefit of any customer who may need it. Any nutrition or health information or claims about any such product also mandates the availability of Nutrition Facts for that product.

OUTDOOR MARKET REQUIREMENTS

Utah Department of Agriculture and Food

The Utah Department of Agriculture and Food is the regulatory authority for food sold and manufactured in Utah. This means foods that are manufactured, processed, packaged, stored, transported, prepared, sold or offered for sale in the state of Utah. This regulatory responsibility also extends to food sold at outdoor market venues including farmers markets. It is the expectation of UDAF that outdoor markets comply with the same requirements that retail food stores must follow. Only food items that are pre-packaged in an approved food establishment with complete labeling information will be allowed for retail sale at an outdoor market. The following list, are requirements that shall be followed by markets and vendors who sell food items at outdoor markets. These requirements are based upon regulations promulgated by the Utah Food Protection Rule R70-530.

REGISTRATION

- The outdoor market shall be registered by the Utah Department of Agriculture and Food.
 - In addition, each vendor who sells food in any form must be registered by UDAF or the local health department as stated in the Food Establishment Registration Rule R70-540. Typically, local health departments permit vendors whose food is intended for immediate consumption and is not in pre-package form.
 - Vendor registration by the Division of Regulatory Services is required for retail sale even if the vendor is registered with another division within the UDAF.
 - The outdoor markets must maintain copies of its and its vendor's permits and provide to an inspector upon request.
 - Each vendor shall display a copy of their permit at the booth that is conspicuous to consumers.

EXEMPTION

- A "Farmers market" means a market where producers of food products sell only fresh, raw, whole, unprocessed, and unprepared food items directly to the final consumer.
 - If all vendors in the market fall within the above definition, the market itself is considered a "Farmers Market" and may be exempt from registration.
- Vendors who grow or produce their own unprocessed fruits, vegetables, grains and eggs will be exempt from registration by UDAF even if the market falls within the Outdoor Market designation.
 - They shall not cut, process, prepare, package produce or offer other prepackaged food products for sale. For example, simply cutting a melon or fruit may negate the exemption.
 - Cut "leafy greens" including micro-greens, whose leaves have been cut, shredded, sliced, torn or otherwise presented to the consumer in a ready to eat form constitutes processing and requires registration with UDAF.
 - Eggs must be maintained at 45 degrees or less.

PERSON IN CHARGE

- A person in charge (PIC) shall be designated by the market.
 - Typically, this would be the person who would accompany an inspector during an inspection and assist in voluntary enforcement actions.

POTENTIALLY HAZARDOUS FOOD

- Potentially hazardous food (PHF) means a food that requires time/temperature control for safety to limit pathogenic microorganism growth or toxin formation.
 - Foods requiring refrigeration shall be maintained at 41 degrees or less.
 - Eggs shall be maintained at 45 degrees or less.
 - Some examples of PHF are meat, fish, cheese, salsas, hummus, juice, yogurt, prepackaged processed produce, cut melons and any prepackaged food that indicates on the label to "keep refrigerated". This is not an all-inclusive list but only a few examples that may be observed at outdoor markets. Please contact the UDAF to determine if a food item is considered a PHF and requires refrigeration.

REFRIGERATED FOODS

- Temperature control is best achieved by mechanical refrigeration, however if ice is used as a refrigerant the following requirements shall be met:
 - Storage of open food products in contact with ice is prohibited.
 - Packaged foods that are subject to the entry of water because of the nature of packaging, wrapping, or container, cannot be stored in contact with ice/water.
 - If ice is the principle means of refrigeration, it must be done in such a way so that the ice is constantly draining (into a proper area or container; not onto the ground).
 - Vendors are required to have a thermometer to verify that equipment is operating at correct temperatures or if using ice, food is maintained at 41 degrees or less.

FROZEN FOODS

- Frozen foods such as meat, fish and foods originally frozen or indicates “keep frozen” on the label shall remain frozen and not be allowed to thaw at an outdoor market.
 - Mechanical refrigeration equipment should be used; however dry ice may be used to maintain **frozen** foods.

SAMPLING

- Sampling on site of any food is an activity that may be regulated by local health departments because food is being offered for immediate consumption. Check with local health departments to determine their specific regulations. A list of health departments can accessed at <http://www.ualhd.org/Department/Department.htm> .

ENFORCEMENT

- Unregistered vendor:
 - The vendor will be required to voluntarily destroy the affected food or remove the food from the market for suspicion of adulteration and or misbranding.
 - The market may receive a citation for allowing an unregistered vendor to sell food at an outdoor market because food is considered “from an unapproved source”.
- Food found out of temperature:
 - The vendor will be required to voluntarily destroy the affected food or remove the food from the market.
 - Food items requiring refrigeration that are found not refrigerated (at 41 degrees or less) as indicated in these requirements will be suspect of temperature abuse.
- Inspectors may complete appropriate documentation such as voluntary destruction forms, hold orders, embargo tags or inspection reports.
- Inspectors will notify the person in charge of any enforcement actions.

It is the policy of the Utah Department of Agriculture and Food to seek voluntary compliance. However, if voluntary compliance is not obtained, additional regulatory action may be deemed necessary. Violations of agriculture laws and rules are punishable, either criminally as a class B misdemeanor, by citation of up to \$500.00, or by civil penalties of up to \$5000.00 per occurrence.

OTHER REQUIREMENTS

- Retail sale of meat have special requirements. Please contact Clay Petersen, 801-913-8968.
- Labels on food products have special requirements. Please contact Rebecca Nielsen, 801-860-7075.
- Retail sale of fish in may have special requirements. Please contact Quincy Boyce, 801-913-8971

State of Utah
DEPARTMENT OF COMMERCE
Division of Corporations & Commercial Code
BUSINESS LICENSING & REGISTRATION GUIDE

All businesses operating in Utah must be registered with the Department of Commerce and licensed with a city or county in the state. The following information explains the benefits of registration and licensure and why and how a business should register and receive a license.

State Registrations

Who Must Register Their Business?

All businesses in Utah are required by law to register with the Utah Department of Commerce either as a "DBA" (Doing Business As), corporation, limited liability company or limited partnership. Businesses are also required to obtain a business license from the city or county in which they are located.

Why Are Businesses Required to Register?

Registration is required so that a comprehensive state registry of all business and corporate information is available for public reference. This information is vital to an orderly legal system and marketplace. Without it, the public or other businesses may have no way of knowing the persons with whom they are doing business.

Where Do You Register Your Business Name?

You can register your business by contacting:

DEPARTMENT OF COMMERCE Division of Corporations & Commercial Code

Mail In:

PO Box 146705

Salt Lake City, Utah 84114-6705

Walk In:

160 East 300 South, Main Floor

Service Center: (801) 530-4849 **Toll Free Number:** (877) 526-3994 (Utah Residents)

Fax: (801) 530-6438

Web Site: <http://www.corporations.utah.gov>

How Can You Reduce Registration Hassles?

The Commerce and Tax Service Center is a one-stop service center created by the Department of Commerce in cooperation with the State Tax Commission. It is located in the lobby of the Heber Wells Building. This service center was designed to reduce hassles and red tape for Utah's business people. The public can now meet nearly all of the state registration requirements in just one stop. In this service center individuals can register all business names, file Articles of Incorporation, organization or certificates of limited partnership and obtain a State Sales Tax License and State Tax Identification Numbers.

City and County Business Licenses

Who Must License Their Business?

By law, all businesses are required to license with the local municipality in which they are doing business. General standards exist for licensure, but each city and county also have unique requirements and procedures. It is best to contact your city or county office to know the exact standards that are set for licensure.

Why Are Municipal Business Licenses Required?

Local licensure ensures that businesses are safe to the public and given the protections under the law to which a licensed business is entitled. A business may be visited or inspected and required to fulfill local zoning, building and parking requirements before receiving a license. This ensures employee and public health, safety and welfare.

When Should a Business License With A County Office?

Counties have jurisdiction over the unincorporated areas of the county. If your business is in an unincorporated area of the county, you should contact your county office.

Some counties require that all businesses that sell food, liquor and gas within county borders are required to receive a special permit or license from the county.

Is it Necessary to Receive a Business License in Each City and County a Business Operates?

The answer to this question in most cases is, yes. However, a phone call to the city or county office will alleviate doubt.

The following is a listing of business licensing offices for all cities with a population of 600 or greater. For information regarding smaller cities, contact the local city offices or telephone listing.

Small Business Development Centers

There are many Small Business Development Centers (SBDCs) located throughout the state. They provide free, personal counseling to new business owners in planning, finance, marketing and management. For information regarding the SBDC near you, contact the Salt Lake City Office:

102 West 500 South, Suite 315, Salt Lake City, UT 84101, Phone: (801)957-3480

Under GRAMA {63-2-201}, all registration information maintained by the Division is classified as public record. For confidentiality purposes, you may use the business entity physical address rather than the residential or private address of any individual affiliated with the entity.
